

Rossmoor Road Resurfacing

(Asphalt Grind and Overlay),
Road/Lane Closures Needed

OC Public Works will perform pavement improvements on several streets within the Rossmoor area for a smoother drive and to extend the service life of streets. See the project area map below. Road / lane closures will be required during project work hours, with limited access to residences during those times. Traffic control measures will be present for everyone's safety. Area motorists should expect delays when traveling through the project area.

WHERE

WHAT

Improvements will include:

- Grinding existing street surface
- Constructing new street surface
- Replacing traffic signal sensors ("loops")
- Installing new traffic striping and markings
- Adjusting utility covers to road surface level

Road / lane closures will be required. Access to residences may be limited during normal working hours depending on location of work. Roadside parking will not be available during project work hours in areas where work is occurring that day. Crews will try to limit work to one half of the street during construction activity in order to keep one half open for drivers. Additional notifications will be placed at doors of residences 48 hours before work starts. "No Parking" signs will also be posted.

WHEN

Anticipated Duration
June 7 — August 2021

Working Days
Monday — Friday

Working Hours

7:00 am — 4:30 pm: Local residential streets
9:00 am — 4:00 pm: Collector streets
(streets connecting smaller residential streets to larger arterial roadways)

Schedule is tentative and subject to change.
